Work Experience:

J. Fagner Design (Owner / Designer) For the past year I have been running my own graphic design business. I find and meet with clients. I conduct extensive brainstorming sessions with my clients before each project. I keep open communications with my clients through the completion of each project and beyond. I frequently will contact clients to make sure all files are still working properly. I design everything from identity marks to websites. Through the past year I have improved my organization and time management skills learning to multi-task and meet multiple deadlines.

Texas Tech Marketing External Operations (Graphic Designer) This was my first job as a designer. I worked with two other designers as a team and was in charge of many various jobs and projects which included; posters for many of Techs athletic teams, corporate partner programs, logos, brochures, schedule cards, schedule magnets, bumper stickers, pennants, stadium jumbo screen graphics and much more. Recently we finished working on a new 2004 football campaign, which included brochures, posters, order forms, and billboards. This job really taught me how to meet deadlines and how to work with team members and superiors to give the client what they want and need.

Belton I.S.D. (Textbook Distributor) At Belton I.S.D. I was in charge of allocating all of the textbooks for all eleven of the schools in the district. I also aided in the delivery of the books to the schools and to individual teachers. I filled out and checked invoices. I kept a very organized warehouse where I would move all boxes into designated areas where I kept documentation of where all books had gone or where they were supposed to go by logging and tracking the isbn numbers. This job taught me very good organization and time management skills.

Petrie Farms (family owned farm and ranch) - I was responsible for many jobs around the property which included building and repairing fences, feeding and caring for cattle, repairing and building gravel roads, care and upkeep of the land, and just about anything else that comes with running a ranch. This job taught me what a hard days work was and set the corner stone for my work ethic.

Freelance work for:
